

ALI ABDELTAWAB BSC

Data Scientist | MSc Statistics and Data Science

CONTACT

- +43 681 20454784
- aliabdeljawad0409@gmail.com
- Hermannsgasse 2A, 1070 Wien
- <https://github.com/Ali-40>

SKILLS

- Machine Learning : Supervised and Unsupervised Learning, Reinforcement Learning, Natural Language Processing (NLP), Computer Vision
- Programming Languages: Python, R, SQL, MATLAB, JavaScript, HTML/CSS
- ML and Data Libraries: Pandas, NumPy, scikit-learn, PyTorch, Matplotlib, Seaborn
- Data Analytics and BI: Power BI, Microsoft Excel (PivotTables, VLOOKUP, Power Query)
- Tools and Platforms: Git, RStudio
- Foundations: Statistics and Mathematics

CERTIFICATES

- Google Data Analytics Certificate

LANGUAGES

- English (Native)
- Arabic (Native)
- German (B1)

EDUCATION

- MSc Statistics and Data Science** 2026 - Present
Johannes Kepler University
- BSc Artificial Intelligence** 2023 - 2026
Johannes Kepler University
- BSc Computers and Artificial Intelligence** 2021 - 2023
Helwan University, Cairo
- Elias American International School, Cairo** 2021

PROJECTS

- Cloud Demand Forecasting and Anomaly Detection**
(MLOps MVP | Python, pandas, scikit-learn, FastAPI, Streamlit, Docker, Git)
 - Built an end-to-end forecasting pipeline based on the M5 dataset: preprocessing → model training → API → dashboard.
 - Performed data preprocessing and feature engineering on daily time series (Store × Category), including lag features and rolling-window features for demand forecasting.
 - Deployed FastAPI endpoints for /forecast and /anomalies with validated request/response schemas.
 - Implemented residual-based anomaly detection using robust MAD Z-score.
 - Developed a Streamlit dashboard and containerized the application using Docker Compose.
- Human Development Analysis & Visualization (Python, Power BI)**
 - Conducted data analysis on the UNDP Human Development Report dataset, focusing on global development indicators (HDI, GII, GNI per capita).
 - Designed interactive dashboards and visualizations using Python (Pandas, Plotly) and Power BI to communicate insights effectively.
 - Explored relationships between education, economic growth, and gender inequality.
- Automated Data Preprocessing System (Python)**
 - Developed an automated data preprocessing tool for detecting, cleaning, and transforming datasets.
 - Built visualizations to support exploratory data analysis (EDA) and data understanding.
- Recommender Systems (Python)**
 - Implemented collaborative filtering and hybrid recommender systems.
 - Evaluated model performance using standard classification metrics, including Precision, Recall, and F1-score.

WORK EXPERIENCE

- Store Associate, Hofer KG, Vienna** 07/2025 - Present
 - Supported daily store operations and inventory processes
 - Worked in a fast-paced team environment with direct customer interaction
- Warehouse Associate, JD Sports, Vienna** 6/2024 - 12/2024
