# Ali Abdeltawab, BSc

Data Scientist | BSc Artificial Intelligence (JKU) | MSc Statistics &  
Data Science (JKU) | Forecasting • Explainable ML | Python • SQL  
Austria

## Summary

I'm Ali Abdeltawab, a data scientist with a BSc in Artificial Intelligence from Johannes Kepler University (JKU) and upcoming Master's studies in Statistics & Data Science. I focus on turning complex, messy datasets into reliable forecasting models and explainable insights that support real operational decisions.

In projects, I've built end-to-end pipelines (data preparation → feature engineering → model training → evaluation → API/dashboard delivery) using Python, SQL, and modern analytics tooling. I care about data quality, reproducibility, and communicating results clearly to both technical and non-technical stakeholders.

I'm currently looking for junior roles in Austria (Linz/Vienna) in Data Science, Analytics, or ML engineering especially where forecasting, anomaly detection, and explainable ML can create measurable impact.

---

## Education

Johannes Kepler Universität Linz

Bachelor's degree, Artificial Intelligence · (2021 - January 2026)
